

# GSA & DOE Seek Innovative Building Technologies

To submit your technology, complete our request for information (RFI) by

**FRIDAY, DECEMBER 11, 2015**

## TARGETED TECHNOLOGIES

This year, we're looking for innovative pre- and early commercial technologies in the following five categories:

- Energy Management
- Window Attachments
- Fans and Blowers
- Renewable Energy
- Water Conservation & Reuse

## Increase Your Technology's Market Acceptance

Participation in GPG or HIT Catalyst can increase market acceptance of your technology by validating real-world performance. Technology evaluations help inform public- and private-sector investment decisions, and accelerate commercialization and adoption within the federal government and the commercial building industry. **Visit [gsa.gov/gpg](http://gsa.gov/gpg) for more information and to access the RFI.**

- **Review and Complete the RFI:** [www.fbo.gov](http://www.fbo.gov) keyword "gpg" or "HIT Catalyst"
- **Register for Webinars,** Thurs. 10/15 & Tues. 12/1, 1 pm ET <http://goo.gl/forms/2appCNzURS>
- **Questions?** [gpg+2016@gsa.gov](mailto:gpg+2016@gsa.gov)

The Green Proving Ground program leverages GSA's real estate portfolio to test innovative building technologies. Working with third-party researchers, GPG helps GSA meet its sustainability goals by providing actionable data that informs investment decisions targeted at energy- and water-use reduction. [gsa.gov/gpg](http://gsa.gov/gpg)

Energy Efficiency & Renewable Energy

DOE's HIT Catalyst facilitates the assessment of high impact technologies in commercial buildings. The program aims to transform the market for these technologies through partnerships with the commercial buildings industry, federal leaders, regional non-profits, utilities and efficiency organizations.
